

PROJECT PROFILE: CRAIGHOUSE QUARRY, MELROSE 2011

Location	Craighouse Quarry Melrose
Client	Tarmac
Value	£169,380.00
Duration	8 Weeks
Quantities	25,000t aggregates minus 20mm, 18,000t Type 1 subbase, 8,000t 20>5 concrete aggregates.
Description	RJT were awarded this contract through a tender process. This contract involved processing as blasted rock into the various materials to be used within the on site asphalt and concrete plants. The customer only required 15% dust production from the crushing process. RJT used the most up to date and most environmentally compliant machinery on this contract. RJT were responsible for hauling all material from the production area to the stockpiling area and all secondary breaking of oversize material.
Key Issues	Health, safety and environmental procedures. Safe operating procedures, Machine isolation procedures,
